  - Right balance of virtual and live

# Spatial Disorientation Trainer

*Develop America's Airmen Today ... for Tomorrow*

- Realistic Spatial Disorientation is a missing capability for AF pilots
- Need enough range of motion to replicate common physiological illusions and enough visual stimulation to simulate “normal” flying illusions
- Expect a basic and advanced capability

# Credible Online Testing

*Develop America's Airmen Today ... for Tomorrow*

- Develop a methodology for conducting online testing which has a reasonable level of integrity and credibility to guarantee the test is taken by the intended subject without external assistance.
- With more distributed learning, the requirement to administer tests “anytime/anywhere” will necessitate the development of methods to verify the recipient

# Mobile Learning (mLearning)

*Develop America's Airmen Today ... for Tomorrow*

- mLearning project for AFRS recruiters and recruits
- Deliver learning whenever and wherever needed
- Ensure access to Knowledge Base information
- Enable quick, informal learning “on the go”
